

Make faster, more effective business decisions, based on data you can trust

esi.manage is integrated business planning and economics software that provides companies with a single trusted source for accurate and transparent planning data. It enables collaborative planning processes across the entire organization, and empowers leaders to make faster, more effective business decisions.

Transparent view of all planning data
esi.manage provides a single source of truth for evergreen planning data. Planners can capture projects at any stage of development and drill down into the details that make up every opportunity.

Rapid scenario analysis

Easily model and compare multiple what-if scenarios, and quickly assess the impact of changes to your plan. Evaluate trade-offs among investment opportunities using value based metrics to confidently select the best path forward.

Actuals tracking & look-backs

Blend production and capital forecasts with integrated actuals from systems of record for financial cost data and production results. Track performance and pro-actively respond to variances against your plan. Easily perform look-backs to drive continuous improvement, and incorporate learnings into your future plans.

Petroleum economics

Develop a variety of economic models from simple tax and royalty schemes to complex PSA/PSC's. Multi-node economic modeling lets you apply fiscal terms to any level of your company hierarchy using secure, transparent, embedded Excel™ fiscal models that give your economists visibility into every calculation.

SUCCESS STORY: HOW ONE COMPANY TRANSFORMED THEIR PLANNING PROCESSES

THE CHALLENGE

Our client was experiencing difficulty producing business plans. They could not effectively visualize and analyze their inventory of investment opportunities. Their disjointed practices relied on numerous spreadsheets, authored by multiple users, that lead to errors, omissions and excessive rework.

CLIENT TESTIMONIAL

“We now have a standard system of record for capturing opportunities which streamlines analysis of the portfolio. The 3esi-Enersight solution allows us to be responsive to changing business environments, and management now has visibility into projects throughout the entire opportunity maturation process.”

A NEW WAY FORWARD

By implementing esi.manage, their opportunity maturation and business planning work-flows have been significantly improved. Their planning processes are far more fluid. Now data is entered one time, in one place, by the person who is responsible for it, and management has the visibility they need to make fast and effective decisions.

3esi • Enersight

3esi-Enersight is the world-leading provider of solutions for integrated strategy, planning and execution in upstream oil and gas.
